Jane Q. Scholar

Department of Computer Science, Example University · City, Country
jane.scholar@example.edu · janescholar.example.edu · ORCID 0000-0000-0000-0000 · github.com/janescholar

Research Interests

Machine learning, probabilistic modelling, causal inference, and their applications to computational social science and public health.

Education

Ph.D., Computer Science, Example University — 2019 – 2024
Thesis: "Scalable Causal Discovery from Observational Data." Advisor: Prof. A. Advisor

M.Sc., Statistics, Sample Institute of Technology — 2017 – 2019

B.Sc., Mathematics (First Class Honours), University of Placeholder — 2013 – 2017

Academic Appointments

Assistant Professor, Dept. of Computer Science, Example University — 2024 – present

Visiting Researcher, Institute for Data Science, Another University — 2023

Selected Publications

Scholar, J. Q., Coauthor, B., Advisor, A. (2024). Fast causal discovery with latent confounders. *Journal of Machine Learning Research*, 25(112), 1–38.

Coauthor, C., **Scholar, J. Q.** (2023). Bayesian estimation of heterogeneous treatment effects. In *Proc. NeurIPS*, 36, 4521–4533.

Scholar, J. Q., Other, D. (2022). Sparse structure learning under distribution shift. In *Proc. ICML*, PMLR 162, 19876–19890.

Other, D., **Scholar, J. Q.**, Advisor, A. (2021). Variational inference for epidemic models. *Annals of Applied Statistics*, 15(3), 1201–1224.

Grants & Funding

Principal Investigator, "Causal Methods for Health Policy," National Science Foundation (USD 450,000) — 2025 – 2028

Early Career Research Grant, Example University (USD 30,000) — 2024

Teaching

Instructor: Machine Learning (grad); Probabilistic Models (grad); Intro. to Data Science (undergrad) — 2024 – present
Supervision: 3 Ph.D. students, 2 M.Sc. students; teaching assistant for 5 courses (2019–2023).

Honours & Awards

- Best Paper Award, ICML Workshop on Causality (2022)
- Dean's Dissertation Prize, Example University (2024)
- Ph.D. Fellowship, Example Foundation (2019–2023)

Service

- Reviewer: JMLR, NeurIPS, ICML, AISTATS
- Program Committee: UAI 2025, CLeaR 2025
- Organiser: Causal ML Seminar (2022–present)

Skills

Languages: Python, R, Julia, C++, SQL · **Tools:** PyTorch, Stan, Git, LaTeX · **Natural languages:** English (native), Spanish (fluent)
